

## SPANISH

¡HOLA! This class introduces your children to a new language in fun and engaging ways where Español is spoken all the time! Your students will learn through interactive learning to develop basic vocabulary around colors, numbers, foods, body parts, family members and animals. Basic communication, early conversations and role-play are a must in our lessons. This class is perfect for beginners but also ideal to challenge students with a pre-existing foundation in the language. For this reason, The Language Labs has created books for beginners, intermediate and more seasoned speakers; Level 1, 2 and 3. We feel that it is very important to teach the Spanish language, but we also take pleasure in sharing with your children our culture, holidays and traditions that we cherish and practice in our native countries. ¡Gracias!

## FRENCH

Bonjour! This Full Immersion class introduces to your students the building blocks of the beautiful French language. Our experienced teachers will always speak in French and use multi-sensory learning techniques that are excellent means for developing vocabulary, grammar and conversation skills. For the more seasoned French speakers, our goal is to keep them challenged and for this reason we have created books with 3 different levels. We strive to change up the activities through a variety of interactive activities, including role-play, art, lively French music & songs, videos and readings. Fun games are always a great way to learn; all students love a good Français board or card game! We make sure to share knowledge of our native French culture and traditions, as it is an important part of learning and gaining a different perspective. Merci beaucoup!

## MANDARIN

Ni hao! This amazing class will be taught through our full immersion method which will allow your students to integrate culture, language instruction and increase students' listening competence. Additionally, Chinese Mandarin is the most spoken language in the world with more than 1 billion speakers! Learning at this young age is a perfect time to understand the 5 different tones, identify some characters and begin to read in "pinyin" (spelling out Chinese phrases with letters from the English alphabet). Your students will learn how to develop basic vocabulary around colors, numbers, foods, body parts, family members and animals. Basic communication and early conversations are strongly encouraged. This class is perfect for beginners but also ideal to challenge those students with a pre-existing foundation in the Mandarin language. The books & workbooks we provide are offered in many different levels. We also take great pleasure in sharing with your children the traditions, culture and important holidays of the Chinese culture with special celebrations, symbolic crafts and typical dances. Xie Xie!
